

## Multidisciplinary care team

*Our mixed delivery model enables us to provide a flexible service that can adapt to meet the needs of our patients and our community.*

General Practitioners (GPs)	Our GP Partners are supported by a team of salaried General Practitioners. They lead our clinical and non-clinical multidisciplinary teams to delivery holistic care to our patients. Our GPs see patients face to face, but also offer telephone consultations and eConsult if that is deemed more appropriate.
GP registrars	Fully qualified medical doctors who are completing their specialist training in General Practice. They work under the supervision of their allocated trainer.
Physician associates	Physician associates are medically trained, generalist healthcare professionals, who work alongside doctors and provide medical care as an integral part of the multidisciplinary team. Physician associates are dependent practitioners working with a dedicated medical supervisor, but are able to work autonomously with appropriate support.
Paramedics	Our team of Paramedics work across all Nexus sites and are highly trained in dealing with acute medical issues. The usually perform acute home visits for our housebound patients.
Nurses	<p>We have a full nursing team across all our sites who have all done further training to become competent in skills needed for General Practice. Practice nurses can carry out cervical smears, immunisations, contraception reviews, wound care and chronic disease management such as asthma, COPD and Diabetes.</p> <p><b>Many Practice nurse appointments are available to book online</b> and they also have telephone call appointments that can be booked for queries on nursing matters such as immunisations.</p> <p>Health care assistants work with the nursing team and are trained in adult immunisations, phlebotomy, wound care, ear syringing, NHS health checks, 24 hour BP monitoring and some annual reviews.</p>
Osteopaths	Our osteopath specialises in neck, back and joint problems and can devise treatment plans to support a recovery from sport related injuries
Pharmacists	Pharmacists are responsible for the safe prescribing of complex and high risk medicines. They respond to central medicine alerts and conduct prescribing safety audits and adjust medication charts post hospital discharges
Physiotherapists	Physiotherapists are available at a number of our sites and you can book an appointment via reception to see them.
Mental Health Practitioners	Mental Health Practitioners work with our clinical team providing specialised mental health support. Your clinical team can arrange an appointment for you.
